RE: Status of Reclamation Bond, St. George Mining
Corporation, Apex Mine, ACT/053/004, Washington
County, Utah

The bond presently held for the Apex Mine operation is \$54,389 (using 1984 figures and escalated to 1985 dollars). The "Memo to File" from Everett Hooper, dated September 16, 1985 (attached), noted two additional disturbed areas that have been added:

1. An "unpermitted" bone yard, and
2. A large concrete bin well.

The memo to E. Hooper from myself dated September 26, 1985 (attached) recommended that these areas be added to the bond estimate. The "Memo to File" from Kathryn Mutz dated February 11, 1986 (attached) documented a crusher unit and stockpile, gravel and cement hoppers and a dry, and a new culvert. Once again, I recommend that all of the disturbances not included in the original 1984 bond estimate be incorporated into an updated estimate and the updated amount posted by the operator.

Please advise.
